### Nieuwsbrief november 2023

#### Informatie tehuis Badulla

Dit keer geen informatie door mij geschreven, maar een persoonlijk berichtje van zuster Premilda:

*'I take this opportunity to thank all the members in Ayubowan group for long years of service with generosity and commitment they do. It was a great support to us that we are able to continue our service to these down trodden children. May God bless each one of you and your family.*

*In common we have 27 children and it differs to each month. All of them are tea pluckers children from different estates. They are age of 11 to 20 years and for protection and transport difficulty of going to school and also economic problem seek our aid. Among there are few because of the harassment of the fathers not able to study at home they come to stay. There are clever once and not so clever but we treat all equally. We encourage them to focus on studies, then sports. Though we have a computer room and we were not able to give them computer knowledge, for the extreme expenses such as high rate electricity and internet and the computers are under repairs. All these years there was a donor who helped us do our house maintenance and last year he has passed away and we are in need of maintaining the house.*

*Each child is looked after well and given the freedom to be themselves. They are well protected and provided with spiritual and physical need specially teaching them good manners another formation to be a better woman in future society. They are happy.*

*Thank you'*
